ABOUT ME

- 8+ years in software development, with a strong DevOps/SRE focus over the last 6 years.
- Proven experience designing and implementing CI/CD solutions using Azure DevOps and GitHub Actions.
- Hands-on experience with Infrastructure as Code (IaC) using Terraform and HashiCorp Cloud Platform to orchestrate deployments of complex cloud environments.
- Strong understanding of Cloud Landing Zone design principles, including architecture, management group hierarchy, networking, access control, security, and monitoring.
- Expert in branching strategies, semantic versioning, and artifact management to maintain consistent, reliable, and traceable software releases.

WORK EXPERIENCE

INTACT/PSI | Cloud Platform / Principal DevOps

Montreal, QC | 2026 – Present

- Leads the migration of 100+ Terraform-based infrastructure projects from GitLab to GitHub, establishing standardized repository structures and delivery practices across cloud infrastructure workloads.
- Designs and implements a new Terraform deployment strategy using GitHub Actions, enabling consistent, automated, and maintainable infrastructure delivery across migrated repositories.
- Defines reusable infrastructure and deployment components, applying code reuse, semantic versioning, and standardization practices to improve the maintainability and scalability of the Terraform delivery framework.
- Delivers standardized Azure Landing Zones to internal product teams, providing governed cloud foundations that enable teams to develop and deploy their applications on Azure.

Project(s): GitLab - GitHub Migration, LOB Platform / Workload Landing Zone

DESJARDINS | Cloud Platform / DevOps Engineer

Montreal, QC | 2022 – 2026

- Builds enterprise-scale Azure infrastructure as code, managing 3 connectivity hubs, 20+ business landing zones, and 50+ application landing zones across multi-tenant, multi-region, and multi-environment setups, ensuring scalable and reliable cloud operations.
- Standardize delivery infrastructure by developing and maintaining a modular Terraform ecosystem, including over 20 reusable lower-level modules and 3 higher-level meta-modules, to ensure consistent and compliant configurations.
- Accelerates delivery cycles by designing, developing, and maintaining GitHub Workflows for cloud deployment processes.
- Reduces internal Jira Service Desk change requests by re-engineering the delivery strategy of frequently changing cloud resources.
- Mentor 10 team members on a new Terraform/GitHub deployment framework, enabling autonomous management of cloud platform operations.

Project(s): Cloud Transformation Program, Connectivity Landing Zone, Business Landing Zone

WORK EXPERIENCE (CONTINUED)

LGI HEALTHCARE SOLUTIONS | DevOps Integrator — Montreal, QC | 2021 – 2022

- Accelerated deployment cycles for 3 SaaS products by implementing a delivery-as-code approach in Azure DevOps, automating build, promotion, and release pipelines.
- Defined and implemented standardized versioning and branching strategies, improving release traceability and alignment with project requirements.

Project(s): Intellium, Strom, EspressoGo

LGI HEALTHCARE SOLUTIONS | FullStack Developer — Montreal, QC | 2018 – 2021

- Designed and implemented automated Azure DevOps pipelines for the Keycloak-based SSO solution, orchestrating build, promotion, and deployment across AKS environments.
- Improved configuration consistency by implementing delivery-as-code through Ansible playbooks and roles, automating the provisioning of Keycloak realms, clients, and settings.
- Enhanced authentication capabilities of the in-house SSO solution by building 2 custom Keycloak extensions enabling 30+ enterprise clients to integrate legacy on-premises directories.
- Standardized branding and user experience across the company's product suite by customizing the Keycloak theme and authentication flow pages using FreeMarker templates.

Project(s): In-House Keycloak-based Single Sign-On solution

EDUCATION & CERTIFICATIONS

HashiCorp Certified | HCTAO-004 Terraform Associate 004 — Certified since 2026

Microsoft Certified | GH-200 - GitHub Actions — Certified since 2025

Microsoft Certified | GH-900 - GitHub Fundamentals — Certified since 2025

Microsoft Certified | AZ-400 - Azure DevOps Engineer Expert — Certified since 2023

Microsoft Certified | AZ-104 - Azure Administrator Associate — Certified since 2023

UQAM | Certificate in Computer Science and Software Development — Montreal, QC | 2015 - 2017

University of Havana | Bachelor's Degree in Accounting and Finance — Havana, Cuba | 2002 - 2007

SKILLS

Cloud | Microsoft Azure

IaC | Terraform · Hashicorp Cloud Platform

CI/CD | Azure DevOps · GitHub Actions

VCS | GitHub · Azure Repos · Bitbucket

Scripting | Bash · PowerShell · Python

CaC | Ansible (roles & playbooks)

Artifacts | Artifactory · ACR · Azure Artifacts

Programming | PHP · C# · Java

UI | Joomla · WordPress · Angular · React

Containers | Docker · K8S (AKS)

Templating | Jinja2 · Nunjucks · FreeMarker

CSS | sass · scss · less

Agile | SAFe · Scrum · Kanban

Collaboration | Jira · Confluence · Teams · Slack
